

The Head Spa

Spa

Facilities using hot water, acoustics, aromatherapy, etc. Water is indispensable for purification.

The head spa is an effective way to take care of hair both for current and future growth. It removes unnecessary sebum and dirt from the scalp (impurity removal). It rejuvenates hair from the roots and can purify, soothe and rebalance the scalp to prevent hair loss. It also promotes the blood circulation and stimulates the autonomic nervous system, which can help tired eyes. By clearing your mind it can also help with cognitive function. Lastly, the head spa can promote anti-aging as it activates the brain and discharges oxytocin, dopamine and serotonin.

KEIKO KAWANO JAPANESE HEAD SPA & SALON

My name is Keiko. I'm a hair stylist with 15 years experience. I am very dedicated to my skills and detail oriented. I'm here to service you and exceed your expectations.

My salon is introducing a new innovative experience - the "Head Spa". This spa is effective for restoring and stimulating hair growth.
